Name:	

What's My Mineral? Worksheet

Pre-Game Questions

Read through all the game instructions and then answer the following questions.

1. List the questions below from least specific to most specific. Which would be the best question to ask near the beginning of the game? Explain your choice.

- a. Is the hardness of your mineral less than 5?
- b. Is your mineral sulfur?
- c. Does your mineral break with a cleavage pattern?
- 2. Player one's mystery mineral is copper. Explain how player one should answer if the opponent asks "Will galena scratch your mineral?"
- 3. What is the penalty for an incorrect guess? Why might a player choose to take that risk?

Post-Game Questions

- 1. Why can't a mineral be classified by color alone?
- 2. Many of the 24 minerals on the properties chart have a white streak. What else do these minerals have in common?
- 3. A mineral has been found that looks like gold. Describe how you would determine whether the mineral is gold or "fool's gold."
- 4. The possibilities for an opponent's mystery mineral have been narrowed down to seven minerals—apatite, biotite, kaolinite, microcline, quartz, talc, and topaz. What question could be asked that would guarantee the elimination of more than two of the remaining possibilities?
